

Business Transformation Services

Business Transformation Services supports successful organisational change

How do you make sure that your organisation can cope with changing operational needs?

Are you achieving your performance objectives without sacrificing operational performance or levels of service to the public?

Is staff resource being spent on fire fighting due to poor planning or organisational understanding?

Change. Improvement. Efficiency.

These themes are becoming increasingly important throughout the public sector. Across the country, police forces and criminal justice organisations are now expected to meet increasingly higher standards of accountability and value while at the same time cutting costs, dealing with obsolete systems and complying with the a growing number of regulations. These requirements demand modern, interoperable and cost-effective processes and systems.

Unisys can help you transform your business model to meet these challenges without causing unacceptable disruption or excessive cost.

Our UK Business Transformation Services team will work with you every step of the way, from evaluating your needs and challenges, to creating and implementing a vision based on our proven framework, to quantifying the value gained. The result? An efficient, integrated and flexible business model that guides and supports your organisation as it strives to meet your goals.

Business Transformation Services

Business Transformation Services (BTS) from Unisys helps clients manage the enterprise, business and technology transformations that accompany any change within an organisation. BTS comprises 3 core competency areas:

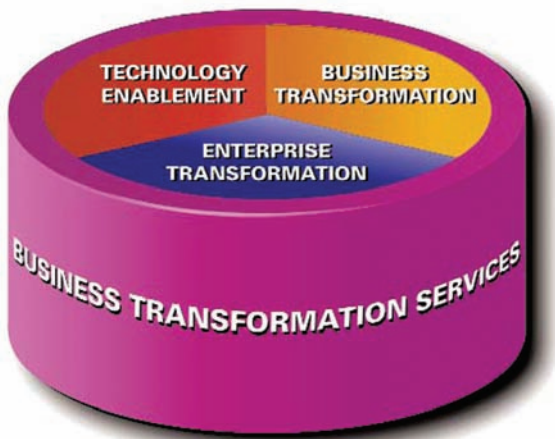

- Enterprise Transformation - which focuses on the IT strategy and capital planning processes.
- Business Transformation - covering business process improvement, change management, performance management, and human capital and organisational design.
- Technology Enablement - dealing with business blueprinting and integrated solutions.

Unisys BTS helps organisations to improve their performance, accountability and value by:

- Defining and aligning business drivers with an organisation's goals.
- Enabling senior leadership to fully understand and define the business case for change and support the implementation efforts.
- Streamlining business processes and identifying processes suitable for repeatable use.

People, Process and Technology

- Enterprise transformation support to help you develop a strategic plan; set objectives and ensure that they are tied to performance measurements; create a consistent enterprise architecture that integrates business strategies, key business processes and enabling technologies.
- Business transformation support that helps you develop a performance management plan with metrics and objectives around your strategic plan. We do though business process innovation, change management, performance management and human and organisational design within an integrated approach.

- Technology enablement support that includes business blueprinting to help you understand the “ripple effect” of IT decisions and implementation-transition management.

What Should be your First Step on the Path to Change or Transformation?

Most organisations are able to understand the reasons for change but many find it extremely difficult to take the appropriate steps needed to initiate the changes and make them part of their organisation’s day-to-day operation.

Unisys realises that no two organisations are identical, yet our extensive experience in the public sector allows us to support your organisation’s transformation without feeling like you are doing it alone and for the first time.

Whether you want to develop a new strategy from scratch, or need to realign your business processes to reflect today’s realities, such as improved cooperation with other forces or criminal justice organisations, Unisys can help.

Unisys will help you meet your increasingly higher standards for accountability and value. With you, we will transform your business model into one that meets all of your performance requirements - from evaluating your needs and challenges, to creating and implementing a

vision based on our proven framework, to quantifying the value gained. The result is an efficient, integrated and flexible business model that provides superior value, allowing you to meet your goals and demonstrate a positive and enduring ROI.

About Unisys

Unisys is a worldwide systems integrator specialising in information technology services and solutions. We offer an end-to-end portfolio of value-based solutions led by our competency in consulting and systems integration, outsourcing, network services and security, combined with leading enterprise-class server and related technologies.

We work with over 300 law enforcement agencies worldwide. In the UK, we have worked closely with police forces across the country for almost 20 years. We have a track record of delivering effective solutions based on understanding the challenges facing policing professionals today.
